

# Do you comply with the Ontario Regulation 79/10 made under the Long-Term Care Home Act, 2007

Made: March 10, 2010

9. Every licensee of a long-term care home shall ensure that the following rules are complied with:
1. All doors leading to stairways and the outside of the home must be,
    - i. kept closed and locked,
    - ii. equipped with a door access control system that is kept on at all times, and
    - iii. equipped with an audible door alarm that allows calls to be cancelled only at the point of activation and,
      - A. is connected to the resident-staff communication and response system, or
      - B. is connected to an audio visual enunciator that is connected to the nurses' station nearest to the door and has a manual reset switch at each door.
  2. All doors leading to non-residential areas must be equipped with locks to restrict unsupervised access to those areas by residents.
  3. Any locks on bedrooms, washrooms, toilet or shower rooms must be designed and maintained so they can be readily released from the outside in an emergency.
  4. All alarms for doors leading to the outside must be connected to a back-up power supply, unless the home is not served by a generator, in which case the staff of the home shall monitor the doors leading to the outside in accordance with the procedures set out in the home's emergency plans.

## Elevators

10. (1) Every licensee of a long-term care home shall ensure that any elevators in the home are equipped to restrict resident access to areas that are not to be accessed by residents. (2) Subsection (1) does not apply to a licensee until 12 months after the coming into force of this section.
