AATEL Communications Inc,

The Trillium Childhood Cancer Support Centre would like to thank you for your generous donation made in support of our camping programs.

As you may be aware, more children with childhood cancer are living longer than ever before. However, the treatment that saves their lives is invasive and painful - parents and professionals agree both the disease and its treatment can devastate a child's body, mind and spirit.

Camp Trillium has been able to provide these children with a normal camp environment. Camp is about sailing, crafts, swimming and campfires. Winter camp means cross-country skiing, fort building, and so much more. It is also about friendships that grow from the acceptance that is so freely given while children are at camp. Friendships last for years because they happen between people who understand life with childhood cancer.

On behalf of the families, I thank you for your gift and look forward to your continuing support.

With Warmest Regards,
