

IMPORTANT NOTICE:

Phase out of Rauland Responder III & III+ Parts

TO: Responder III and Responder III+ Nurse Call End User Customers

SUBJECT: PHASE OUT OF RESPONDER® III & III+ NURSECALL PARTS

In September 1999, Rauland-Borg announced the discontinuance of Responder III / Responder III+ systems.

Since that time, Rauland-Borg and AATEL have continued to supply many system components to support the expansion and repair of Responder III systems. This is well beyond the recommendations of the Electronic Industries Association (EIA).

Rauland-Borg will no longer manufacture Responder III / Responder III+ system components, and as a result, they are discontinuing all nurse call models specifically used only for Responder III systems including consoles and stations. Items listed below will only be available while supplies last or until December 31, 2010.

- BS140 RIII Single Ent/HR Bed Station
- BS240 RIII Dual Ent/HR Bed Station
- DS230 RIII Duty Station
- NCS4010 RIII+ Touchscreen Console
- SRS110 RIII Staff Register St
- SS130 RIII Staff Station

AATEL will continue to repair many Responder III models that are sent in for service as long as parts are available. Currently the inventory levels are very limited. After December 31, 2010 or when supplies are exhausted, we will no longer be able to ship replacements for units that cannot be repaired.

AATEL is encouraging facilities with Responder III Nurse Call systems to discuss the Responder Upgrade promotion with your AATEL Account Manager. Our commitment is to keep your communications, security, and life safety systems current to code and within facility standards.

Your Account Manager is:

Please call or email your Account Manager to further discuss the Responder Upgrade Promotion, and to open discussions for the go forward plan to keeping your facility communications operating.

Communications ❖ Life Safety ❖ Security
